## SUMMARY

Mobile Software Engineer with 4 years of experience building and scaling Flutter-based fintech applications serving millions of users. Specializes in performance optimization, server-driven UI architectures, and cross-platform mobile development (Flutter, SwiftUI, Jetpack Compose). Published technical author and experienced speaker at Google Developer events.

## EXPERIENCE

### PowerUp Money

*Software Development Engineer II*

Bengaluru, India

*June 2025 – Present*

*Note: PowerUp Money was spun off from Uni Cards as a separate company following an internal product separation.*

- Founding Mobile Engineer, leading a team of 4 to architect and ship a full-fledged mutual fund advisory application built on Flutter.
- Grew the app to 500,000+ downloads on Android and 50,000+ on iOS, maintaining a 99.16% Sentry error-free rate (May 2026).
- Reduced app startup time, resulting in an application experience perceived to be nearly 2x faster.
- Optimized WebView load performance using URL preloading and improved rendering techniques, significantly enhancing page responsiveness.
- Implemented an in-house server-driven UI architecture, accelerating feature rollout and maintaining scalability across the product.
- Increased user engagement and retention by launching advisory features: in-house fund rating/ranking, portfolio tracking, benchmark comparisons (Nifty 50/100), rebalancing plans, portfolio breakdowns, and curated fund collections.
- Planned to enhance retention further with integrated buy/sell and research features, creating a seamless end-to-end investment experience.

### Uni Cards

*Software Development Engineer I & II*

Bengaluru, India

*September 2023 – May 2025*

- Worked on multiple fintech products including peer-to-peer lending, credit cards, and personal loans within the Uni Cards app, using Flutter.
- Maintained and grew the app for 10 million+ users on both Android and iOS platforms.
- Led internal development of Financial Freedom features for the PowerUp App product.
- Solved platform-level engineering challenges:
  - Evaluated and implemented mono-repo vs. Git submodule architecture strategies.
  - Improved state management patterns across multiple complex use cases.
  - Reduced redundant API calls to improve overall app performance.

### Tickertape (Smallcase)

*Software Development Engineer I – Mobile App Developer*

Bengaluru, India (Remote)

*November 2022 – September 2023*

- Delivered multiple product features using Flutter on both Android and iOS:
  - Built TT Social from scratch – a social investing feature.
  - Built TT Learn from scratch – an in-app financial education module.
  - Developed Equity and Mutual Fund Watchlist features.
  - Implemented Smallcase Pages integration.
  - Redesigned the onboarding and login flow.
  - Shipped Dynamic Island and Live Activity feature (iOS 16+).
  - Delivered Market Mood Indicator (MMI) enhancements.
- Resolved critical production-level P0 bugs ensuring system stability.

## SKILLS

**Programming Languages:** Dart, Swift, Kotlin, Java, C++, Python

**Frameworks & Tools:** Flutter, SwiftUI, Jetpack Compose, Firebase, Reactive Programming

**Areas:** Cross-platform Mobile Development, Performance Optimization, Server-Driven UI, State Management, Multi-modular Architecture, App Store Deployment

## EDUCATION

---

**GITS, Udaipur**

*August 2019 – July 2023*

*B.Tech in Computer Science Engineering – Cumulative GPA: 9.4 / 10.0*

## PUBLICATIONS

---

- **Dynamic Island & Live Activities with Flutter & Swift** – Medium, June 2023.
- **Migrating from Manual Riverpod Providers to @riverpod Annotations** – Medium, February 2026.
- **Upgrading Rive in Flutter: The Move to a Native Runtime** – Medium, January 2026.
- **Managing Configuration & Signing on iOS Apps** – Medium, October 2024.
- **Multi-Modular Architecture with Git Submodules on Flutter** – Medium, November 2023.
- **Self-Autonomous Car Simulation Using Deep Q-Learning Algorithm** – IEEE, February 2023.

## SPEAKING & EXTRA-CURRICULAR

---

- **Flutter & Firebase: A Symphony of Real-Time Dataflow** – Speaker at Devfest23 Udaipur, December 2023.
- **Flutter Spotlight: Intro, Features & What's Next!** – Speaker at Google I/O Extended Udaipur, September 2023.
- **Intro to Hybrid App Development with Flutter** – Speaker at GDG Udaipur, April 2023.
